

planting seeds of hope

In Your Face! ☺

*Reality Based Professional Development Services
Training, Facilitation, and Consulting*

Planting Seeds of Hope is a series of sessions designed to assist students identified as at-risk for failure due to academic, socio-economic reasons, and other issues teen face on a daily basis.

Ideal students are those who have not been exposed to the Criminal Justice system, yet are prime candidates to follow that path. These groups are designed for prevention and intervention for students. The groups also provide a voice for students to vent and share experiences with the group facilitator and each other, to seek positive ways of dealing with negative encounters in the school districts.

Co-ed, male, and female groups can be provided. The sessions are interactive, fun, and educational. Topics include:

- Creative Conflict Resolution
- Anger Management
- Drug and Alcohol Awareness
- Sexually Transmitted Disease Awareness
- Cultural/Family Sharing
- Independent Living
- Self-Esteem Building
- Stereotyping
- Causes of Violence
- Stopping Violence
- Bullying
- Respect and Responsibility

Groups can be tailored to meet the needs of your district or organization.
